Ultimate Member: Registration Activation Email

https://www.youtube.com/watch?v=AuAPvSmo3CQ
https://www.youtube.com/watch?v=so33OViB4R0

1. Create new role
Ultimate Member > User Roles > New > Registration status : Require email activation
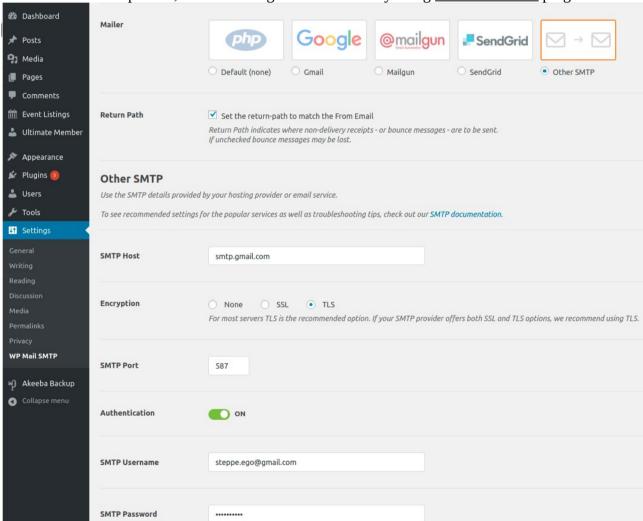

2. Set default role upon registering
Ultimate member > Settings > Appearance > Registration forms > Registration Default Role : above

3. Enable Registration Activation Email
Ultimate member > Settings > Email > Account Activation Email > Tick

4. If no mail server present, then use Google's mail server by using WP Mail SMTP plugin

5. Ready your Gmail account:

1. Go to the "Settings", e.g. click on the "Gears" icon and select "Settings".

2. Click on "Forwarding and POP/IMAP".

3. Enable "IMAP Access" and/or "POP Download"

4. See: https://support.google.com/accounts/answer/6010255?hl=en for details. The page contains a link to enable "Less secure apps" in MyAccount.

5. You can also enable "Less secure apps" (third-party mail clients) from: "MyAccount" > "Sign-in & security" > "Connected apps & sites" > "Allow less secure apps"
